Answer

March is indeed a key month for controlled burns in Naperville, with both the City of Naperville and the Naperville Park District conducting prescribed burns during the spring season. The spring burning window typically runs from March 1 through April 30 ¹ ³.

These controlled burns serve several important ecological purposes:

- **Ecosystem Restoration:** They help eliminate weedy woody species and improve native plant communities ¹
- **Invasive Species Control:** Prescribed burns clear the ground of invasive weeds ³
- **Nutrient Recycling:** The burns help return ³

The burns are carefully planned and executed by trained professionals.

Specific considerations include:

- Obtaining permits from the Illinois Environmental Protection Agency (IEPA)
- Checking weather conditions like wind speed, temperature, and humidity
- Ensuring low chance of precipitation
- Conducting burns only during daylight hours
- Notifying local residents before burns take place ¹ ²

For the 2024 spring season, the Naperville Park District is planning prescribed burns at multiple locations, including:

- Meadow Glens
- Rock Ridge Park
- Brighton Ridge Park
- Hobson Grove
- Knoch Knolls Park
- DuPage River Park
- Ashwood Park
- Commissioners Park ³

These controlled burns are a critical tool for maintaining the health of local ecosystems, mimicking the natural fire cycles that existed before widespread land development ² ⁴ .
